PROFESSIONAL SUMMARY

Computer Science Engineering student with strong skills in Java and Spring Boot, along with a good understanding of frontend development. Passionate about backend development, problem-solving, and building practical software solutions.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, SQL

Backend: Core Java, Spring Boot, Spring Security, Spring MVC, Servlets, REST APIs, JWT, Swagger/OpenAPI

Databases: MySQL, MongoDB, Redis **ORM:** Hibernate ORM

Frontend: React 19, Vite, Vanilla CSS

Tools & Practices: Git, GitHub, Maven, Postman, Flyway, Code Review, Unit/Integration Testing, SDLC

EXPERIENCE

Prodigy InfoTech

Aug 2026

Backend Web Development Intern

Remote

- Developed REST APIs for a Hotel Management project using Java, Spring Boot, MySQL, and Flyway, implementing CRUD operations, JWT authentication, and role-based access control (ADMIN/OWNER/GUEST).
- Designed a hotel-room booking API with date-range conflict detection to prevent double-booking, with per-role authorization enforced across room and booking endpoints.
- Added Redis-backed caching using Spring Cache with differentiated TTLs (5–30 min) for room and user lookups, along with automatic cache eviction on writes to reduce redundant database reads.
- Applied centralized exception handling, Bean Validation, and versioned Flyway migrations to maintain a consistent, production-style backend codebase.

PROJECTS

CIVICA | *AI-Powered Civic Infrastructure Platform* – [GitHub](#)

- Designed and built a full-stack civic issue reporting platform with role-based workflows using Spring Security, JWT, MongoDB, and Redis, tracking issue lifecycle from OPEN → IN PROGRESS → RESOLVED for citizens and authorities.
- Trained a YOLOv8 detection pipeline on 10,000+ images across 5 categories for automated issue classification, reaching ~**85% accuracy** via confidence-score filtering.
- Added Redis caching with duplicate-issue detection, cutting redundant submissions by ~**35%**; used MongoDB geospatial queries for location-aware issue prioritization at scale.
- Placed **3rd of 140+ teams** at Graphic Era University Hackathon (Apr 2025).

NoteSphere | *Intelligent Journal Management Platform* – [GitHub](#)

- Engineered a secure journaling platform using Spring Boot and MongoDB with JWT + OAuth2 authentication, user-specific data isolation, and role-based access control across all endpoints.
- Integrated VADER-based sentiment analysis and rule-based NLP auto-tagging to surface emotional patterns and improve journal content discoverability.
- Designed and documented REST APIs end-to-end using Swagger/OpenAPI and Postman; Redis caching reduced average MongoDB read latency by ~**40%**.

EDUCATION

Graphic Era Hill University

2023 – 2027

B.Tech, CSE (AI & ML)

Mnemonic Convent Sr. Sec. School

2022

Class XII, CBSE

ACHIEVEMENTS & CERTIFICATIONS

- **Bharat Builds Tour – First Commit Hackathon** – Participant (Sep 2026), organized by WeMakeDevs in collaboration with AWS. [Verify](#)
- **Prodigy InfoTech – Backend Web Development Internship** – Completed a 1-month internship in Backend Web Development from 1st August 2026 to 31st August 2026. [Verify](#)
- **JPMorgan Chase & Co. – Software Engineering Job Simulation** – Completed a Software Engineering Job Simulation through Forage. [Verify](#)
