LeetCode

Portfolio

Professional Summary

Backend Developer skilled in Spring Boot, Spring Security, REST APIs, MongoDB, MySQL, Redis, and JWT authentication. Experienced in building scalable backend systems, geospatial querying, caching, and AI-integrated applications.

Education

Graphic Era Hill University, Dehradun

2023 – 2027

B.Tech CSE Specialization in AI & ML

Class XII (CBSE)

2022

Mnemonic Convent Sr. Sec. School, Haldwani

Class X (CBSE)

2020

Mnemonic Convent Sr. Sec. School, Haldwani

Technical Skills

Languages: Java, Python, C, SQL

Backend: Spring Boot, Spring Security, REST APIs, JWT, OAuth2, Redis, Swagger/OpenAPI

Frontend: HTML, CSS, JavaScript

Databases: MySQL, MongoDB

Tools: Git, GitHub, Maven, Postman

Projects

CIVICA – AI Powered Civic Issue Reporting Platform

Tech Stack: Java, Spring Boot, Spring Security, MongoDB, Redis, YOLOv8

- Developed scalable REST APIs for civic issue reporting and management using Spring Boot and layered architecture.
- Implemented Spring Security with JWT authentication and role-based authorization for secure user workflows.
- Integrated Redis caching and MongoDB geospatial querying for optimized nearby issue detection and faster retrieval.
- Built YOLOv8-based object detection pipeline to identify potholes, garbage, and waterlogging from uploaded images.
- Designed duplicate issue detection and workflow management system with OPEN, IN_PROGRESS, and RESOLVED states.
- Added Swagger/OpenAPI documentation for API testing and developer usability.

NoteSphere – Intelligent Journaling Backend System

Tech Stack: Java, Spring Boot, MongoDB, Redis, OAuth2

- Built secure journaling REST APIs using Spring Boot with DTO-Service-Repository layered architecture.
- Implemented JWT authentication, OAuth2 authorization flow, and Spring Security for secure user access management.
- Integrated Redis caching for optimized journal retrieval and improved backend performance.
- Developed sentiment analysis and intelligent tagging features for personalized journal management.
- Added Swagger/OpenAPI integration for API visualization, testing, and documentation.

Virtual Experience

JPMorgan Chase & Co. Software Engineering Job Simulation – Forge

- Completed practical backend engineering and software problem-solving tasks.
- Worked on REST APIs, integration workflows, and software engineering concepts.

Certifications

- AWS Cloud Essentials
- Complete Data Science, Machine Learning, DL, NLP Bootcamp – Udemy
- JPMorgan Chase & Co. Software Engineering Job Simulation – Forge

Achievements

- Participated in intra-college hackathon focused on real-world software problem solving.
- Active LeetCode problem solver focused on DSA and backend development concepts.
